## Education

---

**Candidate, Honours Bachelor of Science**

*September 2018 - Present*

**University Of Toronto Scarborough**

**GPA - 4.0**

- Computer Science, Mathematics, and Statistics CO-OP, 1st year
- Awards: University of Toronto Entrance Scholarship (\$1500)

## Relevant Experiences

---

**Executive / Photographer**

*October 2018 - Present*

**Association of Mathematical and Computer Science Students**

- Exhibiting excellent communication skills by helping to organize and photograph numerous CS related activities, such as hackathons and exam review workshops, which attracts packed rooms each event, and has assisted over 500 students

**Programmer**

**September 2017 - June 2018**

**UHS Robotics Club**

- Demonstrated cooperation skills by using github as version control among 4 team members
- Showed a positive and persistent attitude while spending multiple late nights after school building and coding the robot
- Developed an automation algorithm using VEX robotics, and won 1st place in regionals for the automation section due to the team's efforts

## Projects

---

**Phone Usage Parental Control App**

**May 2018 - July 2018**

- Developed object oriented-programming skills by applying knowledge gained in school, by demonstrating usage of data encapsulation, abstract classes, overloading, and object inheritance, which resulted in a secure and stylistically quality program
- Showed genuine interest in software development and gained deeper knowledge of the android system, by exploring activities and how android handle different situations
- Demonstrated curiosity and an ability to learn independently, as android studio was fully self-taught. The app was finished over the span of 6 weeks, from knowing nothing, to a finished product
